

# Cedar (71) (Todd County)

## OVERVIEW

Cedar Lake is a clear water lake with light development and is bordered by Highway 71. Development is restricted around the lake due to roadways near the west and north shores and marsh areas on the south. Water clarity was good with a secchi disk reading of 13 feet in mid-August which allows vegetation to grow to depths of 19 feet. Flatstem pondweed and coontail were the most common submergent plants found in the lake. Sand was the most abundant shallow water substrate. The lake has very little fishing structure other than weedlines and a steeper drop-off along the west side. Cedar Lake supports a variety of fish species including largemouth bass, northern pike, bluegill, black crappie, and walleye. This variety attracts anglers on a regular basis.

**ID:** 7701600

**County:** Todd

**Near:** Little Sauk

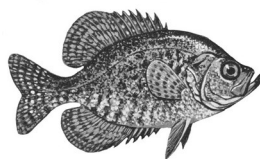

**Area:** 138.67 acres

**Littoral area:** 95 acres

**Shore length:** 2.03 miles

**Mean depth:** 14.9 feet

**Maximum depth:** 29 feet
