

# Stop guessing and try soil testing!

Water Quality  
is everyone's concern.

**Choose wisely...right chemical, right time, right place, right pest.**

Soil testing can take the guesswork out of a lot of our garden and lawn care efforts. Be a better gardener by knowing what is going on under your feet. You can have fertile and productive soils without overusing many fertilizers and chemicals that might end up washing into our lakes and rivers. [CLICK to LEARN MORE](#)
