

Fairy Lake (Todd County)

OVERVIEW

Fairy Lake is a medium-sized basin with a maximum depth of 35 feet. Water clarity often exceeds 12 feet and nutrient levels are low when compared to other lakes in central Minnesota. Fairy is a popular recreational lake featuring a large, well maintained public beach and boat access area. Northern Cisco (Tullibee) continue to reside in Fairy Lake. Cisco are sensitive to degradation of water quality and their continued presence is a positive indicator of lake health. Also residing in the lake are at least three additional pollution intolerant species including the Iowa Darter, Banded Killifish, and Blackchin Shiner. The presence of these intolerant species is further evidence that the lake provides desirable water quality and habitat conditions. Proper land use practices in the watershed and along the shoreline are encouraged to maintain the lake's water quality. Minimizing vegetation removal and other habitat disruption along the lakeshore will help ensure Fairy Lake continues to provide valuable fish and wildlife habitat.

ID: 77015400

County: Todd

Near: Little Sauk

Area: 306.92 acres

Littoral area: 140 acres

Shore length: 4.15 miles

Mean depth: 16.5 feet

Maximum depth: 35 feet
