

Westport Lake (Pope County)

OVERVIEW

Westport Lake is a shallow, highly productive basin located one mile west of Westport. This basin has a maximum depth of 12.0 feet and an estimated average depth is approximately 3.0 feet. Water quality can be seasonally impaired due to algal blooms in the summer. Aquatic vegetation is common and can become dense. Likely due in part to the high productivity and moderate average depth, Westport has experienced a number of winterkill or partial winterkill events (2001, 2009, and 2014). Winterkill events will likely continue to shape the fish community, gamefish size and abundance, and fishing potential. An improved access is located on the north shoreline off a frontage road.

Westport Lake is infested with two aquatic invasive species, Chinese mystery snail and curly leaf pondweed. Anglers are reminded to drain boats and equipment prior to moving between bodies of water to minimize the risk of transferring aquatic invasive species.

ID: 61002900

County: Pope

Near: Westport

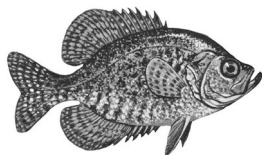

Area: 203.13 acres

Littoral area: 203.13 acres

Shore length: 4.83 miles

Mean depth: 3 feet

Maximum depth: 12 feet
