

Redbelly Snake

General Description: Tiny, about the size of a night crawler, nonvenomous snake.

Color: Two color variations: One is brown or reddish-brown with a single lighter stripe. The other is gray with four dark stripes. Both have red undersides.

Length: 8 -10 inches.

Habitat: Found in woods and sandy areas near sources of water.

Food: Insects, earthworms, and slugs.

*Minnesota's smallest snake.
