Gray treefrog

General Description: Closely resembles the Cope's gray treefrog and can only be distinguished in the field by their slower call. This frog can change colors.

Color: Can vary from mottled grayish green to solid green- with bright yellow-orange coloring on inner surface of hind legs.

Length: 1 1/4 - 2 inches.

Habitat: Shallow wetlands within or near forested habitat.

Food: Moths, beetles, flies, ants, and spiders.
