Mink frog

General Description: Common medium-sized aquatic frog.

Color: Blotchy green and brown with pale underside and bright green lips. Male may have bright yellow throat.

Length: 2 -3 inches long.

Habitat: Live in/near lakes and rivers with water pads and lilies that they use to hop across to avoid predators.

Food: Insects (beetles, dragon flies, moths), spiders, and leeches

*fun fact - Their skin produces a musky odor similar to a mink when the frog is handled.
